

## Rio BTC (Bolt to Chain) Track Pads

Our bolt to chain Roadliner track pads, incorporates a steel grouser plate bonded to our premium rubber pads, which bolts directly onto your machines chain. Easily field replaceable, while adding versatility to your excavation equipment.

## Rio CO (Clip On) Track Pads

Specially designed for steel tracked excavators, Rio Clip On Rubber Track Pads are easily bolted onto the side of your existing track shoe using a side bracket and hardware eliminating the need to modify your existing track shoe. Perfect for light duty and temporary use while giving you undercarriage protection.

# Rio BTS (Bolt to Shoe) Track Pads

## RioPads™ - Premium Rubber Track Pads

Premium Rubber Track pads utilize the highest industrial-grade premium rubber to maximize safety and wear-life on severe inclines, slippery pavement / foundations, and erosion-prone areas. Bolt directly onto your existing pre-drilled steel shoe is maximizing equipment uptime even in the field. The characteristic of Rio Premium Rubber Track Pads will bring you more steering-control and increasing overall undercarriage protection against severe shock and continuous equipment vibration.

## Riopads™ DoubleTop™ Polyurethane Track Pads

DoubleTop™ Poly Pads feature industrial grade poly material for enhanced equipment steering. Bolt directly to existing steel track shoes to prevent track damage to existing pavement and hard surface foundations. DoubleTop™ Poly Pads are available in sizes to fit all major brand heavy crawler, highway cold-milling planers, and asphalt / concrete pavers.
